the association

ACTE, European Textile Collectivities Association, was founded in Portugal, in 1991, by six municipalities and is currently one of the first associations of local authorities at European level. The founding aim of ACTE is to represent and defend the interests of territorial collectivities and adherent organisations that represent territories with a presence of the textile, clothing, leather, footwear and fashion accessories sectors.

the members

ACTE is made up of more than 70 European members and has two types of members:

- **Effective members:** European local and regional authorities.
- **Adherent members:** universities, technology centres, chambers of commerce, business and trade union organisations, etc.

how to become member of acte

Any European local or regional authority or other organisation may submit the application form to the ACTE Executive Secretariat. New applications for membership are subject to the approval of the Executive Committee and the Annual General Assembly.

the objectives

- To represent the interests and needs of member territories to the European Union and national institutions.
- To tighten institutional collaboration ties and to promote the exchange of experiences between members in areas such as economic promotion, employment, training, culture and development cooperation.
- To promote innovative policies to anticipate and manage the structural changes of the sector at local and regional level.

the activities

- **Lobbying actions:** to contribute to the development and implementation of European and national policies, to discuss and collaborate with the European institutions and the social and economic players (business associations, trade unions, etc.) in representation of the interests of the member territories.
- **Preparation and management of joint projects** in all spheres of activity of the network, co-financed in the framework of European and national programmes.
- **Awareness raising actions:** to foster the external communication of the member territories' situation through the organisation of international conferences, the presence in pertinent media and the dissemination of publications.
